NIOSH hazardous
drugs reference

We offer the industry's largest unit dose oral solids portfolio – with more products on the way.

List of antineoplastic and other hazardous drugs AHP produces as defined by the Department of Health and Human Services Centers of Disease and Prevention National Institute of Occupational Safety and Health's NIOSH list of Antineoplastic and Other Hazardous drugs in Healthcare Settings, 2016.

December 1, 2019 marks the official date for USP general chapter <800> compliance. Alongside general chapters <797> and <795>, <800> standards were created to support safe hazardous drug handling while protecting patients and caregivers alike.

Effective medication procurement strategies require reliable access to needed treatments. While you are optimizing your own strategy – mitigating in-house repackaging tasks by sourcing pre-packaged medications – consider AHP.

*These are items identified at the time of publication. The AHP product line continues to develop. If you have any questions regarding the accuracy of this list, contact AHP or reference the current NIOSH list.

06 Group 1:
Antineoplastic drugs

06 Group 2:
Non-antineoplastic drugs

08 Group 3

Support adherence to USP general chapter <800> with unit dose products

American Health Packaging offers a large selection of antineoplastic and hazardous drugs as part of an industry-leading portfolio of unit-dose products. This document serves as a reference for those treatments, as defined by the National Institute of Occupational Safety and Health (NIOSH), that are produced by AHP in a unit-dose package. Products are listed based on their NIOSH classification:

Group 1: Antineoplastic drugs

(AHFS Classification 10:00) ASHP/AHFS DI 2016]

Many of these drugs may pose a reproductive risk for susceptible populations.

Group 2: Non-antineoplastic drugs

These meet one or more of the NIOSH criteria for hazardous drugs. Some of these drugs may pose a reproductive risk for susceptible populations.

Group 3

Primarily pose a reproductive risk to men and women who are actively trying to conceive and women who are pregnant or breastfeeding, because some of these drugs may be present in breast milk.

AHP unit dose as part of a strategy for protecting staff when handling hazardous drugs

According to "Table 5. Personal protective equipment and engineering controls for working with hazardous drugs in healthcare settings" within "NIOSH List of Antineoplastic and Other Hazardous Drugs in Healthcare Settings, 2016", administration of an intact tablet or capsule from unit dose packaging does not require double chemotherapy gloves, protective gown, eye/face protection, or respiratory protection.

Unit dose oral solids - Group 1: Antineoplastic drugs

Hitting the mark

AHP unit dose simplifies one of the most complex parts of your job – reliably obtaining needed treatments – in a format that promotes positive outcomes for your patients.

In business for over 30 years, American Health Packaging is the market leader in providing barcoded unit dose oral solids to the healthcare marketplace. We provide a specialized portfolio of nearly 600 oral solid, liquid, and inhalation products to support bedside point-of-care initiatives. Our manufacturing facility is registered with the Food and Drug Administration (FDA), adheres to current Good Manufacturing Practices (cGMP), and is licensed by the Drug Enforcement Administration (DEA) to package Schedule II-IV controlled substances.
