

# Why SUNRx is the Choice of Covered Entities

## Proven & Stable Platform

SUNRx began as a TPA in 2006 with FQHCs and has strived to become the choice across all Covered Entities, delivering quality and innovative 340B services. SUNRx maintains integrity through a rigorous process to pass the SOC2 certification and is HIPPA and HITECH compliant.

## Compliance/Service Model

SUNRx is a 340B service, technology enabled TPA, fully committed to assisting clients by focusing on compliance and providing the highest level of customer service. The SUNRx account team is dedicated to each client with subject matter experts that can be contacted directly to provide support, financial reviews and more, in support of the 340B program. In addition, the account management teams have decades of combined experience in 340B and can provide clients with solutions that will help maintain and comply with existing 340B rules.

## Audit Support

The SUNRx account management teams train clients to conduct self-audits on a regular basis and will provide support upon request in preparation for and during external audits and HRSA audits.

## Referral Claim Capture

The referral claim capture functionality assists Covered Entities and their clients to increase claims capture by providing a way to review 3rd Party Claims that are in a pending status. Claims can be in pending status if the prescription was written by a prescriber who does not exist within the SUNRx system, for instance, the specialists where your patients are referred. These prescriptions are often for specialty medications.

SUNRx also offers an **Advanced Claims Capture** product to deliver greater compliant savings.

## Uninsured Prescription Discount Program/Cash Card with Sliding-Scale Functionality

SUNRx includes in a contract pharmacy solution, an industry leading real-time at point-of-service cash program with robust, customizable sliding scale functionality to support our client's uninsured population.

SUNRx applies proprietary "lower of" pricing technology — ensuring that covered entities and patients always pay the lower of the 340B, usual and customary or network price at a contracted pharmacy, where applicable. This functionality is designed to meet the needs of federally qualified health centers. The system is flexible to allow for customization based upon each of our client's needs.

## Marketing Support

New clients receive posters and fliers in multiple languages to communicate their mission of providing affordable medications to those without insurance or prescription coverage.
