A Message From Our CEO

Welcome to our Q3 Newsletter.

Greetings and thank you for taking the time to catch up on what's going on in the industry and what's going on at D2 Solutions.

Many of our recent conversations with clients and with prospects are not unique to healthcare. It is about a problem that's plaguing all industry sectors. It revolves around labor shortages and the impact it is having upon providing goods and services. As you know, there is no room for error in healthcare. As a result, D2 has responded and is pleased to offer a modular, technology-enabled solution that can seamlessly integrate with your existing legacy systems to alleviate some of the performance stress that is being endured by your team.

About Us

D2 Solutions empowers healthcare leaders with a unique combination of SaaS solutions and deep consulting expertise. We bring pharmaceutical manufacturers, payers, pharmacies & support providers, and patients together. It's an approach we call, "The Point of Progress." That's both a promise and a call to action, empowering manufacturers to bring therapies to market faster and pharmacies to bring those therapies to the patients who need them. We lead manufacturers through the commercialization process, adding value to Trade & Distribution, Market Access & Reimbursement, and Patient Services.

We also stand with pharmacies and hospital IDNs, providing the guidance they need to achieve compliance and licensure, solve regulatory challenges, and better connect with patients. Our proprietary technologies move clients even closer to their goals, finding that one point where everything moves forward.
